AdPod

By STATIQ

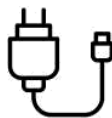

You've got an EV ?

Adpod got you covered

Free Charger

Free Charging

Free Fuel

Features

1. Over the air automatic software updates
2. Output power 22kw, AC charger
3. Integrated payment system for hassle free experience
4. Auto cut-off on Charging completion
5. Set charging prices according to the demand
6. Start and stop from anywhere anytime
7. 4 charging points(two 7.68kw guns + two 3.3kw smart socket)
8. Smart connectivity with statiq app
9. RFID Mobile app enabled
10. Real time charging data monitoring
11. Dynamic load management, load gets distributed equally if 2 cars are charging simultaneously

STATIQ

Business Proposal

We at Statiq are building India's largest EV Charging Network, which provides end-to-end-E mobility solutions such as EV Chargers, Charging Stations Management Software (CSMS), Analytics dashboard, a customer centric mobile application to discover nearby EV chargers, pre-book a slot and payments.

We have been incubated by Y Combinator and Nasscom. Our advisory board includes the founders and inventors of Gmail, Fitbit and Tesla Superchargers. Statiq has its presence in the United States, Netherland, Egypt and Indian markets.

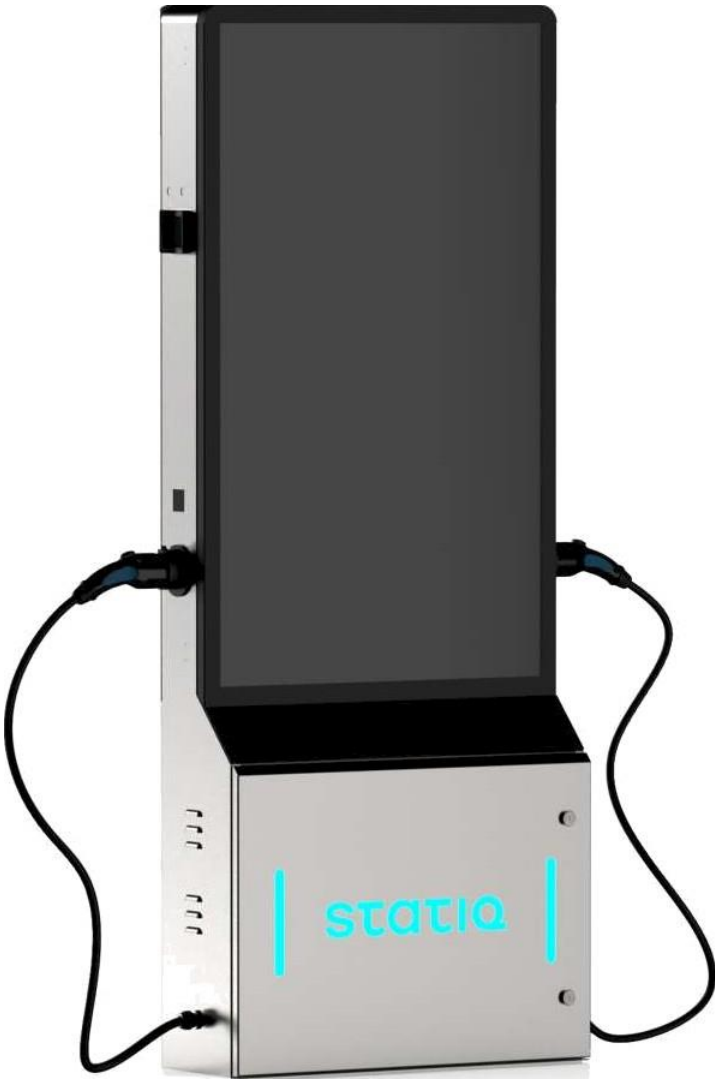

We want to work with your society as per the policy issued by NITI AAYOG and FAME India to accelerate the adoption of Electric Vehicles in India by providing the convenience of EV charging at your doorstep.

Please find below our proposal:

1. We plan to install our product Statiq AdPod in your society to provide charging infrastructure for two, three and four-wheeler vehicles for a period of 8 year.
2. Statiq will take care of supply, installation, commissioning and operation of these chargers.
3. The society will be responsible for building the platform, providing electricity connection until the charging point and all regulatory permissions.

S No.	Charger Type	Type	Units
01	Adpod 22kW Charger(two 7.68kw charging gun + two 3.3kW smart socket)	AC	01

4. To enhance the adoption of EVs in societies, Statiq further commits to allow free charging for the residents for a period of one year of Statiq AdPod. This includes the actual cost of electricity, which will also be paid by Statiq for a period of one year.
5. Post one year, Statiq will charge the amount as per actuals and will not charge any overheads on Statiq AdPod. i.e. statiq will only charge the amount equivalent to cost of electricity as per actuals.
6. Statiq will provide you with a comprehensive dashboard for monitoring of the charger installed at your property.
